

MW24FP1 TV/DVD/VCR Tri-Play

KEY FEATURES

- FST PURE® Flat Tube Design
- 4-Head/19-Micron Head Hi-Fi VCR
- JPEG Viewer
- Digital Comb Filter

- Stereo TV with Double Baffle Speaker System
- VHS Hi-Fi Stereo
- WMA & MP3 Playback
- StableSound®
- Headphone Jack

- New Icon TV/VCR Menu, Text DVD
- 4 Picture Preference Modes
- Sleep Timer
- Auto Clock for VCR
- Commercial Skip for VCR
- Glow System Remote Control

ADVANTAGE TOSHIBA

- 24" set with Full-Featured DVD Player and built-in VCR for the ultimate in convenience
- Full-function 4 Head Hi-Fi Stereo VCR for special effects and optimum audio quality
- FST PURE® Flat tube eliminates unwanted reflections from room light compared to conventional tube designs and increases viewing angle
- Stereo TV with Double Baffle Speaker System offers outstanding audio performance
- New Icon TV/VCR Menu for intuitive control of various video and audio functions
- New Picture Preference Modes allows quick access to preset video settings
- DVD-Video/CD/Video CD playback. DVD-R/CD-R/CD-RW* Compatible playback ensures discs made with personal computers can be played back in the home theater system, too
- Front AV Inputs for easy connection of video games or a camcorder
- Front Panel Headphone Jack allows for individual listening privacy

TECHNOLOGY & BENEFITS

VIDEO

- **FST PURE® Flat Tube Design** - Due to its flat design, viewing angle and picture linearity are greatly improved over traditional tube designs, delivering the most accurate, life-like images possible.
- **4-Head/19-Micron Head System** - Offers superior slow motion effects over conventional 2 head VCR designs. Toshiba's 19-Micron Heads match precisely the width of the SP and SLP azimuths and read only the signal recorded on each azimuth (not adjoining tracks). The benefit is significantly enhanced SLP performance so good, it rivals the quality of tapes recorded in the SP Mode.
- **Digital Picture Zoom** - This interactive DVD feature allows you to select an area of the picture you want to zoom in on and magnify it. Enhanced digital processing during moving video or freeze-frame playback produces superior color fidelity and resolution, even when you're zoomed in. Also can be used to expand letterbox-only films to increase the viewable area on-screen.
- **JPEG Viewer** - Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

AUDIO

- **Double Baffle Stereo Speaker System** - These front-firing, side-mounted speakers deliver the best stereo sound by keeping the sonic image widely separated within the cabinet.
- **VHS Hi-Fi Stereo** - Delivers the highest quality stereo sound from tapes recorded with a high fidelity soundtrack.

- **WMA & MP3 Playback** - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.
- **StableSound®** - This feature maintains television volume within a preset range regardless of the source signal. This eliminates the annoyance of normal program volume being followed immediately by extremely loud commercial messages or drastic volume fluctuations while changing channels.

CONVENIENCE

- **New Icon TV/VCR Menu, Text DVD** - Offers simple operation by using picture symbols of key menu functions instead of plain text. Quickly access various TV features via pull down menus.
- **Picture Preference Modes** - Includes preset picture settings tailored for various programs and allows quick adjustments at the touch of a button. Instead of accessing Brightness, Contrast, Color, or Tint each time you switch from a movie to a sporting event, use the preset Picture Preference Modes (Standard, Sports, Movie, Memory) to change the quality of the picture without all the fuss. The Memory Mode allows you to customize your own settings and save them into the television's memory.
- **Commercial Skip** - After a program has been recorded, pressing the SKIP button once during playback will automatically advance the tape 30-seconds forward bypassing recorded commercials. Pressing the skip button on the remote again will advance the recorded tape for another 30-seconds for a total of 60-seconds (30 sec x 6 Maximum).

SPECIFICATIONS

MW24FP1

*CD-R/CD-RW discs recorded by CD-CA method can be played back. Some CD-R/CD-RW discs may be incompatible due to laser pick-up and disc design. DVD-R discs recorded by DVD Video method can be played. Some DVD-R discs may be incompatible due to laser pick-up and disc design. WMA, MP3 and JPEG discs may be incompatible due to different recording format or condition of disc.
